

Project Structure

Date	16 November 2022
Teamid	PNT2022TMID43319
Project name	Fertilizer recommendation system for disease prediction
Maximum marks	4 marks

The screenshot displays the Visual Studio Code interface for a project named 'Harvestify-master'. The Explorer sidebar on the left shows the project structure, including folders for 'Data', 'models', 'static', 'templates', and 'utils', along with various Python files like 'disease.py', 'fertilizer.py', 'model.py', 'app.py', and 'config.py'. The main editor window shows the code for 'app.py', which includes imports for Flask, NumPy, Pandas, and various utility modules, followed by comments indicating the loading of trained models. The Output panel at the bottom shows the message 'Loading configuration... Done loading configuration'. The status bar at the bottom indicates the current file is 'Ln 1, Col 1' with 'Spaces: 4' and 'UTF-8' encoding, and the Python interpreter is set to 'Win32'.

```
app.py
1 # Importing essential libraries and modules
2
3 from flask import Flask, render_template, request, Markup
4 import numpy as np
5 import pandas as pd
6 from utils.disease import disease_dic
7 from utils.fertilizer import fertilizer_dic
8 import requests
9 import config
10 import pickle
11 import io
12 import torch
13 from torchvision import transforms
14 from PIL import Image
15 from utils.model import ResNet9
16 # -----
17
18 # -----LOADING THE TRAINED MODELS -----
19
20 # Loading plant disease classification model
21
```

Output:

```
Loading configuration...
Done loading configuration
```
